Reference: Mister Roberto Gamba endorsement

To Whom it may concern,

The entire Wisdom audio Team is joining me in endorsing Mister Roberto Gamba principle of The Needle. Mr Gamba has successfully completed all our factory training course ahead of each Wisdom Audio Academy and applied his knowledge to design some of the finest Private Theater and Media room we have been fortunate to see.

While designing high performance home theater require many skills (acoustic, physics, Audio, Video, Lighting, control...), calibrating a system is a true Art which requires years of experience to truly master.

Roberto has worked several times with our team and I am please to confirm his calibration skills places him in the top tiers of the best calibrator worldwide.

I have no reservation in endorsing him to design and calibrate any entertainment space.

Best Regards,

Luc Guillaume

Wisdom Audio, Managing Director
